

kyndryl™

Opportunità e rischi dell'AI e investimenti in servizi e tecnologie per garantire la sicurezza del settore finanziario e dei cittadini

Federico Botti

Vice President Security & Resiliency Practice,
Kyndryl Italia

A 'cyber resilience by design' approach to secure digital business

Kyndryl's Security Operations Center in Rome

600 billion security events collected and analyzed

20.000 security incidents handled, including more than 600 high-risk incidents

<30 minutes average incident handling time

Detect Earlier, Respond Faster.

Rome's Security Operations Center to proactively defend against sophisticated cyber attacks and safeguard digital assets and infrastructure

Based on Automation we're accelerating incident response to provide lightning-fast searches, queries and investigations

We're using Artificial Intelligence enhancing threat detection, response, and prediction through machine learning algorithms

How we drive value for our global customers

Global Experience

Global visibility and cross-industry understanding of threat trends and cyber risks associated with digital transformation

Automation & Platform Integration

People & Skills

170+ skilled Italian professionals in integration with 7500+ colleagues worldwide

Wide ecosystem of technology alliances & partners

Security & Resiliency Integration

Benefits

Flexible and customizable service delivery model

Hybrid model for resilient infrastructures and customer proximity.

Kyndryl's Federated SOC model promotes interoperability among autonomous SOC/CSIRT entities

→ We've built relationships with some of Europe's leading companies in the financial services sector

kyndryl™

Thank you

Embrace a 'cyber
resilience by design'
approach.
